

80/20 is Expanding its Product Line with 22 New Profiles!

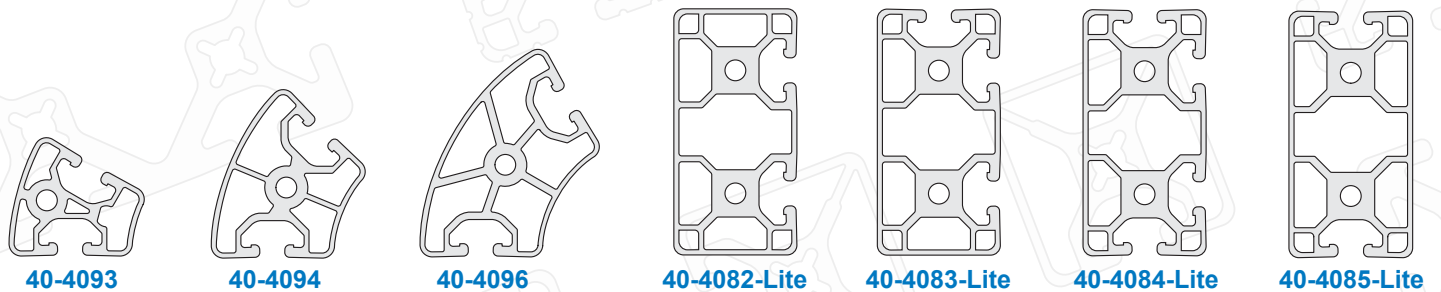

The 80/20 product line will soon include twenty-two new 15 and 40 Series T-slotted profiles, all featuring our standard clear anodized finish.

The new 15 Series profiles, including thirteen smooth and two grooved, are available in 145" and 242" stock lengths* or cut to desired length. For accessories and machining services, see the Fractional section of the 80/20 catalog.

*1501-LS, 1502-LS, 1503-LS, 1504-LS and 1517-LS are currently available in only 145" lengths.

Seven new profiles, all available in 4m lengths or cut to length, have been added to the 40 Series, including three new radius profiles. Turn to the Metric section of the catalog for compatible accessories and machining services.

80/20's expanded line of Fractional and Metric aluminum extruded profiles provides new options for you when creating your next solution!
