

HOW WE CAN HELP YOU **COMPLY**

Application Assistance

Machine designers and plant safety engineers consume a fair amount of time identifying the right machine safety products for workers protection. Neff Power Engineers are trained to help you understand how to comply by recommending the right product for your application.

Design & Fabrication

Our fully staffed design and application engineers design, fabricate and assemble hard guarding for point of operation protection or enclosures for the entire machine.

Our 80/20 design team provides CAD drawings with bill of materials for your documentation. Choose a kit where we provide labels and assembly diagrams to make the process easy, or if you're in a hurry, let us assemble your aluminum extrusion project for you. Your order will arrive on your dock assembled, tested and ready for immediate use. Build on-site services available.

United States Locations

Missouri, Illinois, Kansas, Oklahoma, Arkansas, New Mexico, Arizona, Texas.
